

# Snapverter

Could replace Kurzweil scan by taking a picture of the text with your smartphone or laptop or tablet and converting the jpg pictures to a readable pdf files that Read Write will work on. !!!! Will send you step by step on "how to" All the best Bill

Snapverter is a free google app that works with Read Write. You take a camera pic with your phone or laptop which becomes a jpg picture. Upload the picture of the text ( test, text or whatever text you want) or drag drop to Drop files here to convert. It converts it to a readable pdf in the Finished folder which Read Write can do it's stuff...> Neat Stuff !!
